

Regional West Medical Center Training Academy

MEDICAL INTERPRETATION TRAINING

BRIDGING THE GAP FOR MEDICAL INTERPRETERS

In this 40 hour course, participants will learn:

Basic Interpreting skills to be an effective interpreter in a medical setting. An overview of the U.S. Health Care System, ethics, communication skills and critical thinking. How to be culturally appropriate. How and when to act as an advocate for your patients. Modes and roles of medical interpretation. Basic medical vocabulary. Professional Development and other resources.

*This is not a certification course but can be used as a prerequisite for certification as a medical interpreter.

Requirements: Must pass a language proficiency exam designed to measure your ability in the target language.
